TO THE

MATHEMATICAL GAZETTE

No. 253, FEBRUARY 1939—No. 257, DECEMBER 1939.

COMPILED BY MRS. T. A. A. BROADBENT.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. The Library.
7. Obituary Notices.
8. Correspondence.
9. Miscellaneous.

ARTICLES, ETC.

AUTHOR.	TITLE.	PAGE.
W. G. Bickley.	Formulae for numerical integration.	352
	Mathematics and the engineering student; some general considerations.	434
M. Black.	Place of logic in the teaching of geometry.	39
A. Buxton.	The teaching of "applied" mathematics.	251
S. Chapman and E. A. Milne.		
	The proof of the formula for the vector triple product.	35
K. C. Chih.	Chinese unit of length in the early Ch'ing dynasty.	268
J. M. Child.	Inequalities connected with a triangle.	138
J. R. Colthurst.	Clocks, cameras and the Lorentz contraction.	443
T. R. Dawson.	"Match-stick" geometry.	161
W. J. Dobbs.	A chapter on commercial arithmetic.	135
E. B. Escott.	Division by iteration.	241

AUTHOR.	TITLE.	PAGE.
W. L. Ferrar.	Algebra in the Higher School Certificate.	144
N. M. Gibbins.	Mutuality.	342
R. L. Goodstein.	Rational triangles.	264
F. H. V. Gulasekharam.	Mr. Gibbins' triangle.	360
C. H. Hardingham.	Triangles with sides and medians commensurable.	448
P. J. Heawood.	The law of quadratic reciprocity.	198
W. Hope-Jones.	Presidential Address, 1939. Simplicity and truthfulness in arithmetic.	7
J. C. Jaeger.	The solution of one-dimensional boundary value problems by the Laplace transformation.	62
G. B. Jeffery.	Mathematics in school and university.	26
G. Lawson.	School algebra of the first year.	246
E. P. Lewis.	Notes on the theory of equations.	376
G. Loria.	Triangles équilatéraux dérivés d'un triangle quelconque.	364
R. C. Lyness.	A geometrical problem.	155
J. P. McCarthy.	A related Tschebyscheff polynomial.	68
N. W. McLachlan.	Application of the Mellin inversion theorem to impulses.	270
E. A. Milne.	See S. Chapman.	
C. G. Paradine.	Apollonian numbers.	451
H. T. H. Piaggio.	The incompleteness of "complete" primitives of differential equations.	49
C. T. Rajagopal.	Some theorems connected with Maclaurin's integral test.	456
M. Sperling.	Two kinds of electricity.	373
Lord Stamp.	Education and the statistical method in business— with special reference to railway statistics.	122
J. A. Todd.	Correspondences in projective geometry.	58
J. Travers.	Rules for bordered magic squares.	349
C. O. Tuckey.	A diagram for the study and solution of triangles.	150
M. C. K. Tweedie.	A graphical method of solving Tartaglian measuring puzzles.	278
G. Wolff.	The Second Report on the teaching of geometry.	185
The Second Report on the teaching of geometry.		169
Discussion :		
A. W. Siddons (p. 169) ; M. A. Hooke (p. 172) ; H. Beardwood (p. 174) ; B. E. Kenworthy-Browne (p. 176) ; S. Inman (p. 178) ; N. F. Sheppard (p. 179) ; W. Hope-Jones (p. 180) ; R. A. M. Kearney (p. 180) ; K. S. Snell (p. 181) ; F. A. Roebuck (p. 182) ; T. A. A. Broadbent (p. 182) ; W. C. Fletcher (p. 182).		
Annual Meeting of the Mathematical Association, 1939.		1
Report of the Council for 1938.		2
The Teaching Committee.		6
The Spens Report.		201
The examinations sub-committee.		202, 302
Editorial Note.		337
Applications of elementary mathematics.		338
The executive committee.		433

MATHEMATICAL NOTES.

PAGE.	AUTHOR.	No.	TITLE.	PAGE.
144				
342	N. Anning.	1390	A note on conics.	295
264	D. Arany.	1406	A question and solution.	389
360	R. J. A. Barnard.	1385	The triple vector product.	288
448	W. G. Bickley.	1415	Series solution of differential equations.	400
198	F. C. Boon.	1386	A sorting problem.	289
7		1388	The addition formula.	292
62	T. S. Broderick.	1416	An A.R.P. problem.	400
	J. L. Burchnall.	1349	The identity in Note 1310.	82
26	J. H. Cadwell.	1421	Rational triangles.	464
246	N. Chatterji.	1368	On a certain class of arithmetical problems.	209
376	J. M. Child.	1396	A query.	301
364	H. L. Cox.	1374	An A.R.P. problem.	213
155	H. J. Curnow.	1434	The maximum value of the product, and of the sum of partial products, of a number of positive quantities whose sum is given.	480
68				
270				
	R. H. Dick.	1354	Apollonian numbers.	88
451		1355	π -formulae.	88
49	W. J. Dobbs.	1387	A simple proof for Feuerbach's theorem.	291
	D. J. Finney.	1423	A problem on paths.	467
456	H. G. Forder.	1422	On gauge constructions.	465
	N. M. Gibbins.	1347	Falling off a log.	79
373		1366	Medial section and logarithms.	207
122		1394	Notes for lessons on the factors of $\Sigma(b-c)^m$.	298
58	W. A. Gilmour.	1391	Pythagorean numbers.	296
349	F. M. Goldner.	1375	The vector triple product.	215
150	R. L. Goodstein.	1353	A note on projective geometry.	86
278		1363	How unlikely.	205
		1364	Ways and means.	206
185		1376	A logical point in dynamics.	215
169	R. Goormaghtigh.	1351	On the direction angles of a straight line in a circumscribable polygon.	83
		1352	A curious rectangle.	85
		1360	On the three-cusped hypocycloid.	92
		1399	To draw a square of which a given parallelogram is the orthogonal projection.	381
	F. H. V. Gulasekharam.			
1		1404	The in-centre and ex-centres of a triangle.	386
2		1405	A note on the analytical geometry of the straight line.	387
6				
201	N. A. Hall.	1412	An elementary derivation of the relation between trigonometric and hyperbolic functions.	397
2, 302	C. H. Hardingham.	1398	Triangles with sides and medians commensurable.	380
337				
338	P. J. Heawood.	1373	On Note 1335.	213
433		1389	On Note 1325: solution to problem 1.	294

AUTHOR.	No.	TITLE.	PAGE.
H. Hilton.	1350	A note on symmetric functions. <i>See also</i> H. Simpson.	82
D. C. Hobson.	1369	To prove that $4 \sin 18^\circ \cos 36^\circ = 1$.	211
W. Hope-Jones.	1380	Approximations to π .	284
A. J. Hull.	1428	Another proof of the identity in Note 1310.	471
E. E. Ironmonger.	1410	Some trigonometrical proofs.	393
J. C. Jaeger.	1365	A family of infinite series.	207
V. P. Kelly.	1370	Dodging limits.	211
D. D. Kosambi.	1382	The multiplication of determinants and vector analysis.	285
B. E. Lawrence.	1356	On Note 1248: to draw a square of which a given parallelogram is the orthogonal projection.	89
E. P. Lewis.	1361	An envelope question.	203
G. J. Lidstone.	1393	Computation of π by aliquot parts.	297
	1418	On the identity discussed in Notes 1310, 1311, 1348, 1349, 1377.	402
	1427	Vandermonde's Theorem and some associated formulae.	469
	1432	Interpolation by proportional parts of mean differences.	476
G. H. Livens.	1381	The triple vector product formulae.	285
H. V. Lowry.	1358	The solution of a quartic equation.	89
A. F. Mackenzie.	1402	The general solution of $ax + by + cz = d$.	384
R. H. Macmillan.	1413	A theorem in elementary solid geometry.	398
F. M. Marzials.	1425	A note on elementary calculus.	468
F. G. Maunsell.	1395	A query.	301
R. F. Muirhead.	1429	An algebraic note.	471
	1430	A proof of the binomial theorem for a positive integral exponent.	473
E. H. Neville.	1348	The identity in Note 1310.	81
	1419	Notes on conics. 1. The orthoptic locus.	463
	1420	A misquoted title.	464
G. L. Parsons.	1357	"Why all this fuss about method?"	89
J. Pedoe.	1409	The addition formulae.	392
D. K. Picken.	1400	On differentiation.	382
H. C. Plummer.	1383	The vector triple product.	286
A. G. G. Richards.	1407	A trigonometrical device.	391
H. W. Richmond.	1367	On Note 1290.	209
T. G. Room.	1384	The vector triple product.	287
D. E. Rutherford.	1375	The vector triple product.	215
F. M. Saxelby.	1417	The triple vector product.	402
R. Sibson.	1359	A note on the construction of numerical examples of algebraic integrals.	90
A. G. Sillitto.	1424	Division without figures.	467
H. Simpson.	1378	On Note 1358.	283
	1379	Correspondences in projective geometry.	284
	1411	On the loci of the ends of polar subtangent and polar subnormal.	396

INDEX

vii

AUTHOR.	No.	TITLE.	PAGE.
C. A. B. Smith.	1433	Gamma function.	479
J. H. Smith.	1403	A note on coordinate geometry.	385
C. N. Srinivasiengar.	1401	On a certain type of partial differential equations.	383
	1414	The "tails" of the Steinerian.	399
C. W. Stokes.	1377	On Notes 1310, 1348, 1349.	283
J. Travers.	1372	A challenge.	213
	1397	Perfect numbers.	302
C. O. Tuckey.	1362	Simplifications.	204
	1408	Why do teachers always draw acute-angled triangles?	391
H. W. Turnbull.	1426	On Note 1395.	469
G. N. Watson.	1346	A postscript to Maunsell's problem in cartophily.	78
	1431	A logical point in dynamics.	475
J. H. M. Wedderburn.			
	1392	The division transformation.	296
ANONYMOUS.	1371	A query.	212
EDITORIAL.	1345	"A problem in cartophily".	77
